DATE: **EXERCISE NO:** **EXERCISE NAME:**

WEEK-1: HTML Frames: Frame Structure: Design a webpage for the online book store using HTML frames. Include a navigation frame, a content frame for displaying book details, and a footer frame for additional information.

WEEK1.html:

```
<!DOCTYPE html>
<html>
  <head>
    <title>Online Book Store</title>
  </head>
  <frameset rows="20%,70%,10%" border="2">
    <iframe src=""></iframe>
    <frame src="navigation.html" name="navFrame">
    <frame src="content.html" name="contentFrame">
    <frame src="footer.html" name="footerFrame">
  </frameset>
</html>
```

Navigation.html:

```
<!DOCTYPE html>
<html>
  <head>
    <title>Navigation</title>
  </head>
  <body bgcolor="BBBBBB">
    <h3>Book Categories</h3>
    <h1>Hello World Welcome to VNRVJIET</h1>
    <ul>
      <li><a href="https://www.microsoft.com" target="contentFrame">Computer Science</a></li>
      <li><a href="https://www.ieee.org target="contentFrame">Electronics</a></li>
      <li><a href="content.html" target="contentFrame">Mechanical</a></li>
      <li><a href="content.html" target="contentFrame">Civil</a></li>
    </ul>
  </body>
</html>
```

Footer.html:

```
<!DOCTYPE html>
<head>
  <title>Footer</title>
</head>
<body bgcolor="90EE90" align="center">
  <p>2025 Online Book Store | Contact: Support@bookstore.com</p>
</body>
</html>
```

Content.html:

```
<!DOCTYPE html>
<html lang="en">
<head>
   <meta charset="UTF-8">
   <title>Book Store</title>
   <link rel="stylesheet" href="content.css">
</head>
<body>

   <section class="categories">
      <h2>Book Categories</h2>
      <ul>

WEBPAGE:

WEEK-3:

JavaScript:

a) User Registration Form

Create a registration form for users signing up on the online bookstore. Validate the following:

- **Username: Should not be empty and must be at least 5 characters long.**
- **Password: Should not be empty and must be at least 8 characters long.**
- **Confirm Password: Should match the entered password.**

b) Forgot Password Form

Implement a form for users to reset their password. Validate the following:

- **Email Address: Should be a valid email format.**
- **Provide feedback if the email address is not associated with any account.**

c) Dynamically Content Loading

Use JavaScript to dynamically load book details into the content frame when a user clicks on a book in the navigation frame.

Week3.html:

```
<!DOCTYPE html>
<html>
   <head>
      <title>Online Book Store - Week 3</title>
   </head>
   <frameset rows="20%,70%,10%" border="2">
      <frame src="navigation.html" name="navFrame">
      <frame src="content.html" name="contentFrame">
      <frame src="footer.html" name="footerFrame">
   </frameset>
</html>
```

Week3.js:

```
// week3.js - Dynamically load book details into the content frame

document.addEventListener('DOMContentLoaded', function () {
   // This script runs inside the navigation frame (navigation.html)
   var navLinks = document.querySelectorAll('a[data-book-id]');
   if (!navLinks.length) {
      return;
   }

   var bookData = {
      'clean-code': {
         title: 'Clean Code',
         author: 'Robert C. Martin',
         category: 'Technology / Programming',
         price: '$20',
         isbn: '978-0132350884',
```

```
        availability: 'In Stock',
        description: 'A handbook of agile software craftsmanship focusing on writing clean, maintainable code.'
    },
    'alchemist': {
        title: 'The Alchemist',
        author: 'Paulo Coelho',
        category: 'Fiction',
        price: '$12',
        isbn: '978-0061122415',
